COURSES IN ENGLISH
WEIHENSTEPHAN AND TRIESDORF CAMPUS
**COURSES IN ENGLISH**

Weihenstephan-Triesdorf University of Applied Sciences offers a wide range of English-taught courses that put the green focus of the university into context.

The courses provide the opportunity to learn about the many facets of sustainable thinking in various disciplines. The emphasis is on processes, technologies, management, and soft skills in relation to the sustainable management of natural resources. In addition to the subject modules, you also have the opportunity to take English, German and other language classes at various levels at the Language Centre.

**FOR STUDENTS FROM ABROAD**

The courses are aimed at international exchange students in particular. Do you have the required academic background and a keen interest in green matters? Do you enjoy learning in an international classroom and developing your intercultural skills? Are you interested in Germany and its culture? If you are, then we look forward to welcoming you!

Spend a semester abroad with us and you won’t just be specialising in the core issues of nature, nutrition and the environment but you will also benefit from state-of-the-art equipment, practice-based teaching and first-class support.

**WEIHENSTEPHAN-TRIESDORF**

The two separate sites of the university offer a range of courses unique in Bavaria. In Weihenstephan, you will live and study close to the historic town centre of Freising and on Munich’s doorstep. In Triesdorf, you will be in the metropolitan region of Nuremberg, the economic and technological centre of Middle Franconia.

**DEPARTMENTS**

- Bioengineering Sciences (Weihenstephan)
- Forestry (Weihenstephan)
- Horticulture and Food Technology (Weihenstephan)
- Landscape Architecture (Weihenstephan)
- Sustainable Agriculture and Energy Systems (Weihenstephan)
- Agriculture, Food, and Nutrition (Triesdorf)
- Environmental Engineering (Triesdorf)

**MODULES**

Our English-taught courses are multidisciplinary in nature and comprise a selection of modules and projects equivalent to approximately 30 ECTS credits per semester.

The modules offered include, for example, the lecture series “Renewable Energy”, “Climate Change and Ecosystem Services” and “Sustainability in Horticulture and Food Technology”. Exchange students are also welcome to participate in ongoing research projects in their field of interest.

For an overview of the current modules, go to: [www.hswt.de/en/programmes-and-projects](http://www.hswt.de/en/programmes-and-projects)

**PARTICIPATION**

- International students enrolled at a university outside of Germany in a relevant study programme can apply for example within the frame of a university cooperation, an exchange programme, or as “Freemover”.
- Prerequisite is an English-language proficiency at level B2 of the Common European Framework of Reference for Languages (CEFR).
- Participation is possible in both the winter and summer semesters.
- Duration: 1-2 semesters
